Special Effect Supply Corp.

Instructions: These two pages are intended to be inserted into a view binder (we used an Avery Economy view binder for 275 pages, or 1 1/2" dia. rings.) We recommend that you print them on nice, brightly colored card stock so that it stands out from all the other special effect supply catalogs that you have next to your bed. You don't need to trim the face page, but the spine needs to be carefully trimmed along the grey line so that it is 1 1/2" wide. You may send us a photo of your binder if you are particularly proud of it. It also wouldn't hurt to have a photo of it in your portfolio when you do job interviews.

Thanks for your loyalty and business,

Steve Biggs
